

MATH DITTOS 2

Fact Controlled **DIVISION** for Special Learners

Version 1.0b

The **MATH DITTOS 2** series is a unique, fact supported approach to teaching computation. Each page in the series presents a limited number of problems with plenty of workspace. The facts necessary to complete each problem are always presented on the page in a fact reference and practice section.

The **MD2** series currently consists of three "workbooks" published as computer documents in the Adobe PDF format, requiring only the free Adobe Reader. A fourth is under development.

- MATH DITTOS 2: Fact Controlled **ADDITION & SUBTRACTION** for Special Learners teaches addition and subtraction simultaneously using a unique "cluster" approach.
- MATH DITTOS 2: Fact Controlled **MULTIPLICATION** for Special Learners presents multiplication in a careful, step-by-step, fact supported approach.
- MATH DITTOS 2: Fact Controlled **SUBTRACTION** for Special Learners can be effectively used for initial instruction in subtraction with fact support and word problems. It is quite effective for the reteach that older students beginning long division frequently need.
- MATH DITTOS 2: Fact Controlled **DIVISION** for Special Learners is still under development.

The concept behind the MD2 series is the same one we've used for years in reading, using a "controlled vocabulary." The vocabulary in this context is the basic facts. Each page is limited to only the facts (much like new vocabulary) presented in a fact cluster. The facts are presented, practiced, and applied to computation.

The files included with this documentation are a beta or pre-release version of part of MATH DITTOS 2: Fact Controlled DIVISION for Special Learners. They may be of some use to you in your teaching responsibilities. Any feedback that you might have will also be helpful in competing an effective teaching tool. While these materials are tested extensively before their release, a fresh eye can always find the mistake that was missed in proofreading!

The graphics on this page should give you a general idea of the approach being employed in the sections **not included** in this beta release. The methodology is a fact controlled approach consistent with the rest of the MATH DITTOS 2 series.

The pages included with this beta 1 release are all two digit divisor pages. The pages are loosely based on an idea from an old (1969) Addison Wesley math book that had a page or two of problems such as these. The idea never took hold in regular math books, but does seem to have its place in teaching special learners how to divide.

Multiplication fact bars to be completed first are included at the left of each page. Following checking of the facts, an extended fact bar on the right is to be completed and checked. Only after both are completed

successfully should the student move on to the division problems in the center of the page.

The completed fact bars should be used for reference, if necessary in completing the division problems. Problems on the page include only multiplication calculations included on that page's fact bars. The fact bars are also extremely effective for estimation (step 1 -- division).

As with previous MATH DITTOS 2 materials, complete answer sheets are provided for teacher and student reference. While there's always the possibility of abuse by students, self-grading and subsequent correction of missed items seems to greatly speed the rate of division skill acquisition.

NOTE: I have not as yet turned loose my minions of crack proofreaders on these answer sheets. I believe they are pretty accurate, but...

As with other MATH DITTOS 2 materials, there is no "teacher's guide" for this workbook (beta...whatever). I believe the task analysis used is pretty clear...teach the steps and progress through increasingly higher facts. I have endeavored to include the "zero times" division answer on as many pages as possible. That one seems to be a real "stopper" for my kids in division.

Legal Stuff

(Otherwise known as a software license!)

The MATH DITTOS 2 series of fact controlled worksheets became freewares as of January 1, 2010. The entire series continues to be protected under U.S. Copyright registration, but users may download, print, and use these materials without charge. This PDF distribution may be freely copied and distributed in its original form with all accompanying documentation to others as long as no fee is charged. Beyond teachers (and homeschoolers) using these materials for classroom instruction, all other rights to the series are retained by the author.

While no payment is required for use of these materials, clicking through one of my affiliate advertisers when you plan to buy something online will help support this series and the Educators' News web site. It would be much appreciated.
